

ONLINE TOUR OF THE LABORATORY OF POPULARIZATION AND PROMOTION OF MATHEMATICS, STEKLOV MATHEMATICAL INSTITUTE OF RUSSIAN ACADEMY OF SCIENCES

October 29, 12:30 (Moscow time, UTC+3h)

The tour is guided by the founder and director of the Laboratory, **Nikolay Andreev**. Nikolay Andreev created a remarkable project, *Mathematical Etudes* (etudes.ru). Together with colleagues, he wrote a wonderful, both instructive and entertaining book *Mathematical Component*, which shows surprisingly diverse manifestations of old and new mathematics in the world around us.

Nikolay Andreev's work has won numerous prizes, including The Gold Medal of Russian Academy of Sciences (2017). This summer, at the General Assembly of the International Mathematical Union in Helsinki he was awarded [the Leelavati Prize](#) “for his contribution to the art of mathematical animation and of mathematical model-building, in a style which inspires the young and the old alike, and which mathematicians around the world can adapt to their varied uses — as well as for his indefatigable efforts to popularize genuine mathematics among the public via videos, lectures, and a prize-winning book.”
