

Criteria for evaluating the solutions of PriMat 2024.

Senior League

1 task: for each item of the task half of the maximum score was given.

For insufficient explanation with the correct range in the answer of item a) the score was reduced.

For failure to provide an estimate in point b) and direct numerical calculations without deriving formulas, the score was reduced.

Task 2: 20 points were given for finding the time interval, and another 20 points for finding the condition for its existence. For the expression not transformed to the end the points were reduced.

Task 3: 20 points were given for each question. Dependencies and proportions must be explained - 10 points, if there is a correct explanation, correct calculation another 10 points. Similarly, in the second item.
